

...played on **the Ultimate** Electronic Table Game Platform

◆ **A Live Host...** makes the DTS-C table a true Casino table game with all the classic appeal and social interaction only a real person can add, controlling game play with a simple push of a button.

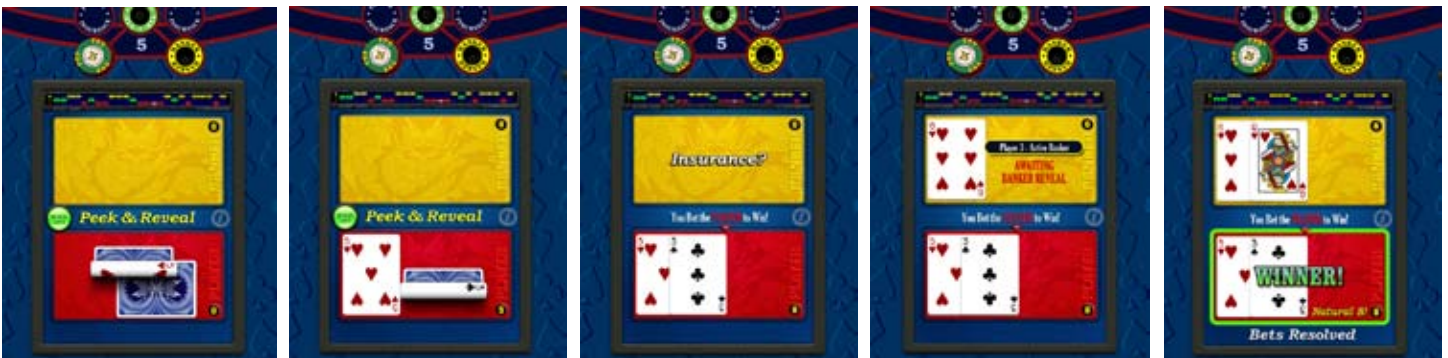

◆ **Automatic Activation...** by placing a bet in one of the three betting circles (Player, Banker or Tie), the system automatically goes to an active screen, verifies that the bet was made and awaits the deal.

◆ **12" Touch Screen Displays...** provide the players with a great view of all the game action as well as enabling card peeking. The active player and banker can peek at the cards and decide when their two cards get revealed.*

◆ **Friendly Status Graphics...** display current Player and Banker hand totals and update as each additional card is dealt. The system informs each player of the current hand totals and any hand situation, such as: "Natural 9," "Natural 8," "Player gets another card" or "Banker gets another card." A player is instantly notified of the winning hand. At the end of the round after the winning hand has been announced, an outcome border will appear on each active player's screen indicating a winning hand, a no win hand, a tie or a push. The difference in the color of the outcome borders instantly notifies the dealer, the player and security of each hand's outcome.

◆ **Previous Play Outcome History...** showing the frequency of wins for the Player, Banker and Ties as well as their scores.
