

...played on **the Ultimate** Electronic Table Game System

❖ **AFT Enabled...** allows the player to easily transfer funds onto the table by entering their personal account number through the built-in player input module. Player credits are always in view and available for play in their on-screen player bank. Players can transfer funds back to their account by simply touching Cash Out. Compatible with most SAS/AFT systems.

❖ **Virtual Cards and Chips...** look and play like the real thing. On-screen virtual chips represent each player's current bank credits and the current amount of any bet or combination of bets placed.

❖ **12" Touch Screen Displays...** provide the players with a great view of all the game action as well as their complete bank and betting information. When it's time to place a bet, a simple touch of the on-screen virtual chips allows the player to quickly make their desired wager. Friendly status graphics help keep the player updated to the game play and the hand outcomes.

❖ **A New Level of Flexibility, Productivity and Security...** never before seen in table games is now available to the casino operator. DTS is fully network-capable and compatible with SAS-enabled financial and player tracking systems.

How to play...Four the Money®

Four the Money™ is a Craps style game using two six sided virtual dice. Players select a bet type and simply touch their chips to place their bets (*see list of bet types below*). Once all bets are in, the next player in succession becomes the designated shooter. When the dice cup appears on the shooter's screen they can touch the cup to move it around the screen and initiate the dice roll or wait for the timer to expire which will automatically roll the dice. Once the shooter rolls, the status of all bets are updated or resolved automatically. The designated shooter continues to roll until they roll a seven. Players can now make additional bets or pull back any bets in between rolls (*according to the bet rules*) until the designated shooter rolls a seven.

Four the Money Wager - Pays 1 to 1: This bet must be placed before the first roll of a new game. It can also be placed again after every fourth roll. To win, the shooter must roll the dice four times without a rolling a 7.

Come Bets - Pays 1 to 1: Once they have placed a "Four the Money" bet, the player has the option of placing the next Come bet prior to every roll of the dice as long as no 7 has been rolled. The player wins each Come bet they place if they go the next four rolls without a 7.

Watch the dice action on host screen!
