

WPT

WORLD POKER TOUR ALL-IN HOLD'EM™

Play the **Ultimate** Electronic Table Games

DTS™
DIGITAL TABLE SYSTEM

The **Cards** and **Chips** are **Virtual...** the **Table Game Experience & Excitement** are **Real!**

It's just you against the dealer! WPT All-In Hold'em™ played on the next generation of DigiDeal's hosted, multi-player digital table system. Featuring a live game host, bringing all the classic appeal and social interaction only a real person can, plus state-of-the-art ticket-in/ticket-out technology and full network connectivity.

DigiDeal
CORPORATION

Putting it All on the Table™

...played on *the Ultimate* Electronic Table Game Platform

♠ **A Live Host...** makes the DTS table a true Casino table game with all the classic appeal and social interaction only a real person can add; controlling game play, handling cashing-in and ticket-out transactions.

♠ **Ticket-In/Ticket-Out...** allows the dealer/host to help players turn their cash into credits through the table's bill validation system. Player credits are always in view and available for play in their on-screen player bank. When a player wants to cash out the dealer can simply cash out a portion or all of a player's bank by printing a cash-out ticket for redemption at the casino cage.

♠ **Virtual Cards and Chips...** look and play like the real thing. Player activated card-curl peeking feature allows players to easily look at their down cards. On-screen virtual chips represent each player's current bank credits and the current amount of any bet or combination of bets placed.

♠ **12" Touch Screen Displays...** provide the players with a great view of all the game action as well as their complete bank and betting information. When it's time to place a bet, a simple touch of the on-screen bet button allows the player to quickly make their desired wager. Friendly status graphics help keep the player updated to the game play and the hand outcomes.

♠ **A New Level of Productivity, Security and Accountability...** never before seen in table games is now available to the casino operator. DTS is fully network capable and compatible with SAS enabled financial tracking systems.

How to play...WPT Digital ALL-IN HOLD'EM™

It's you against the dealer!

To get into the game, a player first makes a "Blind Ante" bet. The player also has the option of placing one or both of the "Bonus" bets at this time. When the bet is right, "You're In!" The dealer and each player are dealt two hole cards face down. Players can now peek at their down cards and decide whether they want to fold or raise their ante bet 5 times (5X) or "All-In" 10 times (10X). The dealer and all the players hole cards are revealed and any "Hole Card" Bonus bets are resolved.

If the dealer's two card total (aces always 11) is 12 or less the dealer will fold against all raises and immediately pays all "blind" ante bets. If the dealer's two card total is 13 or higher all 5x raises are called and with a total of 17 or more the dealer calls all raises. The dealer will then "flop" five community cards. If the player beats the dealer their ante and raise bets are paid. All players that have made a final hand bonus bet are in to the end when the "Final Hand" bet is resolved.

DEALER FOLDS with a total of 12* or less.

DEALER CALLS ALL 5X RAISES with any pair or a total of 13* or higher

DEALER CALLS ALL RAISES with any pair or a total of 17* or higher

*Aces always 11

Optional "Bonus Bets" are made prior to the player receiving their hole cards
