

# Classic BACCARAT

...with More Ways to Win Big!

...played on *the Ultimate* Electronic Table Game Platform

DTS-V...full virtual

DTS-C...with live chips

Classic Baccarat is so much more than traditional Baccarat! In addition to offering two exciting bonus side bets, Classic Baccarat on the DTS System offers a true table game experience while outperforming felt tables two to one.

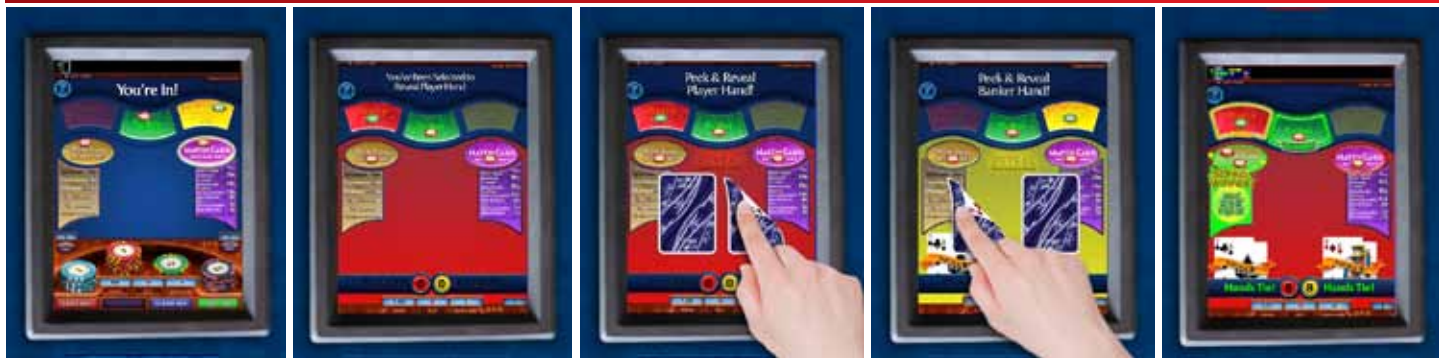

## Two Exciting Side Bets!

Only Classic Baccarat offers the players two exciting side bets in addition to the main game. The Casino can choose none, one or two popular side bets to offer: **Win Sum Bonus™** and **Match Card Bonus™**.

## The Choice is Yours!

Classic Baccarat is now available on the DTS platform in a live chip or full virtual version. The standalone DTS-C live chip version gives you all the benefits of a fast, secure, digital game platform while still using traditional chips and a dealer. Or, go to the next level and play Classic Baccarat on the DTS-V all virtual platform, where both the cards and chips are virtual and you're connected to your SAS backend system for player tracking and game monitoring. Use bills or tickets to buy in with a table host and play fully hosted, semi-hosted or auto-host mode. Use AFT and you can go fully automatic. Both platforms offer the player large 12-inch touch screen displays that provide a great view of all the game action as well as the player's complete bank and betting information. When it's time to place a bet, a simple touch of the on-screen virtual chips allows the player to quickly make their desired wager. Friendly status graphics help keep the player updated on all the game play.

## Play Classic Baccarat with up to two optional bonus bets!

Classic Baccarat follows traditional baccarat game play, with players betting on the outcome of a Player Hand versus a Banker Hand, with the hand closest to a total of nine winning the game round. If the casino chooses, the revealing of each hand may be assigned to a specific player or to the dealer. On the DigiDeal table, either card may be peeked from any angle, preserving the traditional peek/reveal experience popular with many Baccarat players. For faster play, the game can also be set to play face up, with the cards revealing as they are dealt.

To get into the game on a DTS-V table a player touches BUY IN and hands the host their buy in cash or ticket. The player verifies the deposit amount and their funds are transferred to their position and the money is converted into on-screen credits and virtual chips. Players can now select the type of bet they wish to make by touching either the Player, Banker or Tie bet circle. Once a bet type selection is made, players add a bet amount by simply touching their chips in the player bank. To remove chips from a bet, players can touch CLEAR or touch the chips in the selected bet circle until their bet is correct. In addition to the main bet, players may place one or two bonus bets (if available) which will be paid according to the house selected bonus pay chart.

After the Player Hand and Banker Hand are played, the outcome shows on each screen and bet results are calculated and displayed automatically. The History Bar at the top of the each player screen records the result and keeps track of the last fifty game outcomes. Each participating player's bank is automatically updated to reflect all wins and losses. Players wishing to leave the game can simply touch CASH OUT.

## The Casino Chooses the Bonus Bets!

There are two popular bonus side bets for the casino to choose from: **Win Sum Bonus** which pays on the sum total of the cards from both hands and **Match Card Bonus** which pays when hands get the same card value. Multiple pay charts are available for each side bet. Now the operator can decide what type of bonus side bet and how many to offer its patrons: two, one or none at all!
